

Evason Phuket & Six Senses Spa Eco Story

Biodiesel Plant installed

Evason Phuket, 30 September 2007: A bio-diesel production plant has been successfully installed at Evason Phuket & Six Senses Spa. The plant allows the resort to convert used cooking oil to bio-diesel, which can replace conventional diesel.

In the test run of the bio-diesel plant, 380 litres of used cooking oil was turned into 300 litres of bio-diesel. The bio-diesel is intended to be used for running generators, chipping machines, long tail boats and vehicles.

Initially, the bio-diesel will be a supplement to the diesel consumption but is

Filtrated Used cooking oil ready to be biodiesel

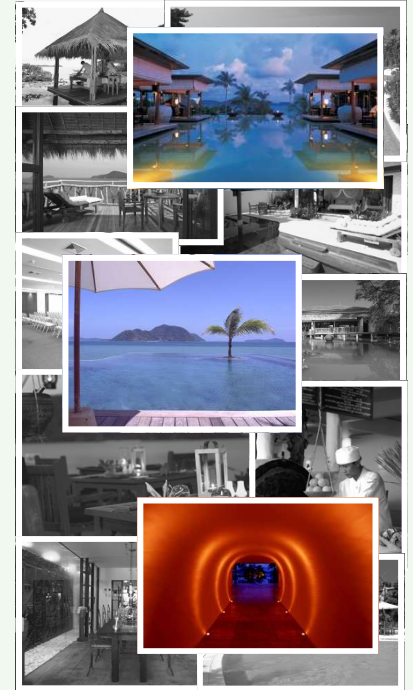

expected to replace all of the resort's diesel consumption. By doing so, the resort will reduce its greenhouse gas emissions by 220 tonnes per year or 5 percent of total emissions.

After demonstration, we operate ourselves
