

Rustic terra-cotta urns dot the grounds of Soneva Gili, and the cool water within is used to soothe bare feet that have been out for too long in the sun.

OPPOSITE: Over-water villas at Soneva Gili are constructed with natural materials, and come with novel touches such as a private sundeck.

## SPA JOURNEY

It is the creation of experiences rather than a product that is at the heart of Six Senses' philosophy.

Founded in 1995, by husband-and-wife team Sonu and Eva Shivdasani, the Six Senses brands have become synonymous with luxurious living and cutting-edge concepts. Together the resorts present a refreshing reinterpretation of five star travel for today's more sophisticated spa-goer. Well-being combined with ethical responsibility for the world we live in, forms the central tenet to the Six Senses philosophy making them all leading and award-winning spas.

Soneva Resorts is committed to offering the highest standards of luxury in an environment that nurtures the area's indigenous feel in design, architecture and service. The resorts entail intelligent luxury at its best where nature fuses with an overall enchanting experience.

Evason Resorts offers redefining experiences that come hand in hand with contemporary and stylish design. Here, the emphasis is firmly placed on dedicated personal service for spirited experiences in desirable destinations.

Evason Hideaways is the boutique category of the Evason brand, where emphasis is placed very much on the attention to detail and on uncompromised standards of luxury. Elegantly designed and completely natural furnishings support the innovative style theme.

In each of the resorts, and integral to the core Six Senses approach, are Six Senses Spas. The spa's uniqueness lies in the quest for perfectly balancing the senses. The pyramid of six spheres used to identify Six Senses Spas represents the philosophy that is fundamental to the human experience. The pyramid's foundation consists of the three primary senses of sight, sound and touch. The second level satisfies the more acute senses of taste and smell, while the apex sphere symbolizes a sense of elation—the sixth sense—which is satisfied only by balancing the previous five senses. It is this, the unique experience of all senses heightened beyond expectation, that Six Senses aims to fulfil by instilling consistency and harmony between what is seen, touched, heard, smelt and experienced.

Six Senses Spas are designed as contemporary sanctuaries that adapt seamlessly to the host cultures and customs. So, wherever in the world you may be, you will be enveloped and nurtured in a truly authentic and ultimately luxurious fashion.
